

BEWARE OF THE Grease Goblin!

LAST SEEN:
Loitering in Sinks
and Drains

WANTED FOR:
Causing Sewer
Overflows

DID YOU KNOW...

Most sanitary sewer backups occur between your home and the town's sewer main?

You can help prevent a costly and unsanitary overflow by following a few simple steps:

- ✓ Scrape excess grease in a container and dispose of it in the garbage.
- ✓ Place food scraps in waste containers or garbage bags for disposal with solid wastes, or start a compost pile; promote use of scraping ware prior to washing.
- ✓ Place a wastebasket in the bathroom to dispose of solid wastes. Disposable diapers, condoms, and personal hygiene products do not belong in the sewer system.
- ✓ Promote the concept of "3 R's": Reduce, Reuse, Recycle.

- ⊗ Pour grease, fats, and oils from cooking down the drain.
- ⊗ Use the toilet as a wastebasket.
- ⊗ Use the sewer as a means of disposing food scraps.
